

## Microsoft Access Security Notice

Microsoft had good intentions when it created the “Microsoft Access Security Notice”. However, it is more of a nuisance than a benefit. Because the message forces you to bypass it each time you open a database, you learn to ignore the message and thus defeat the purpose of this security notice.

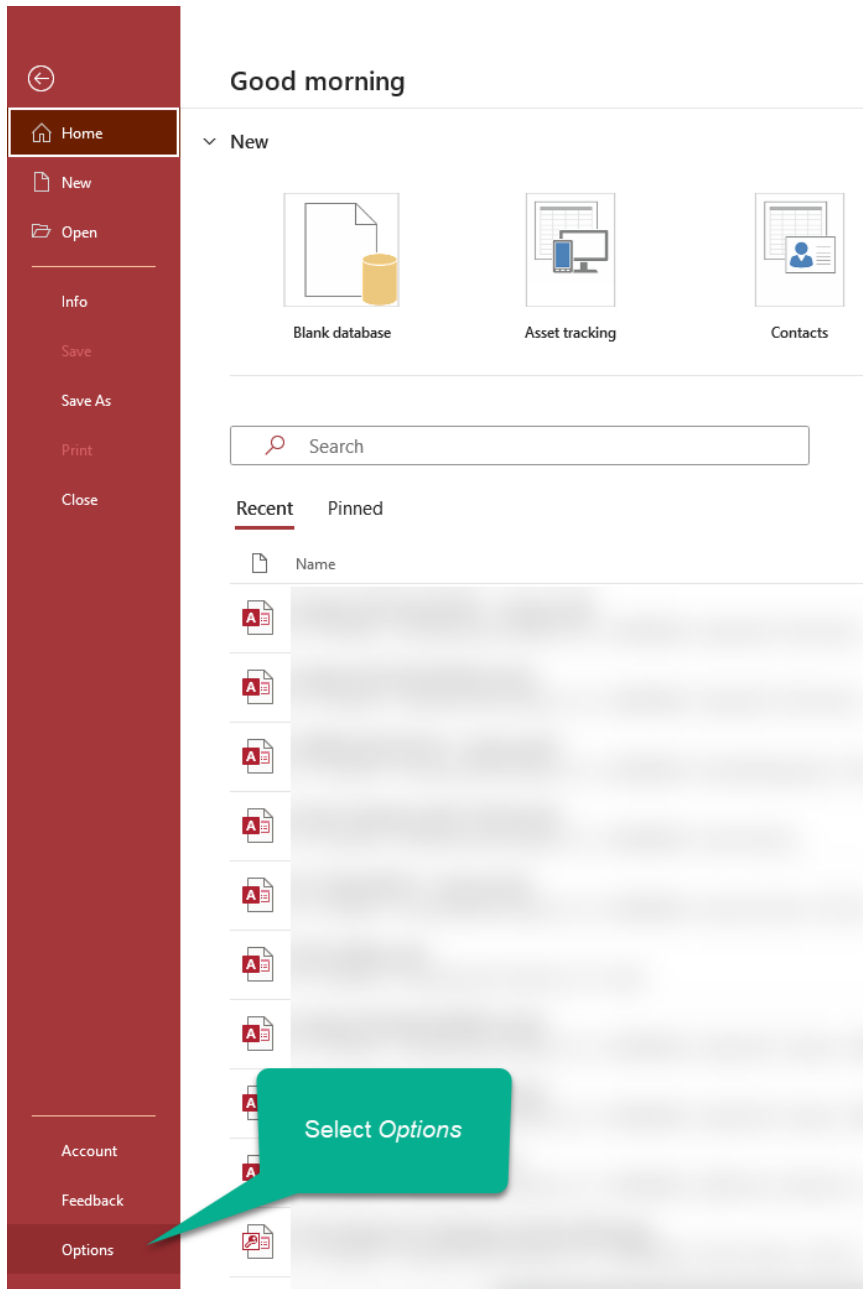

It is important to stress that we take security very seriously. We take precautions to ensure our products do not contain adware or malicious software and are safe for all users. Our products do not contain “unsafe content that could harm your computer”.

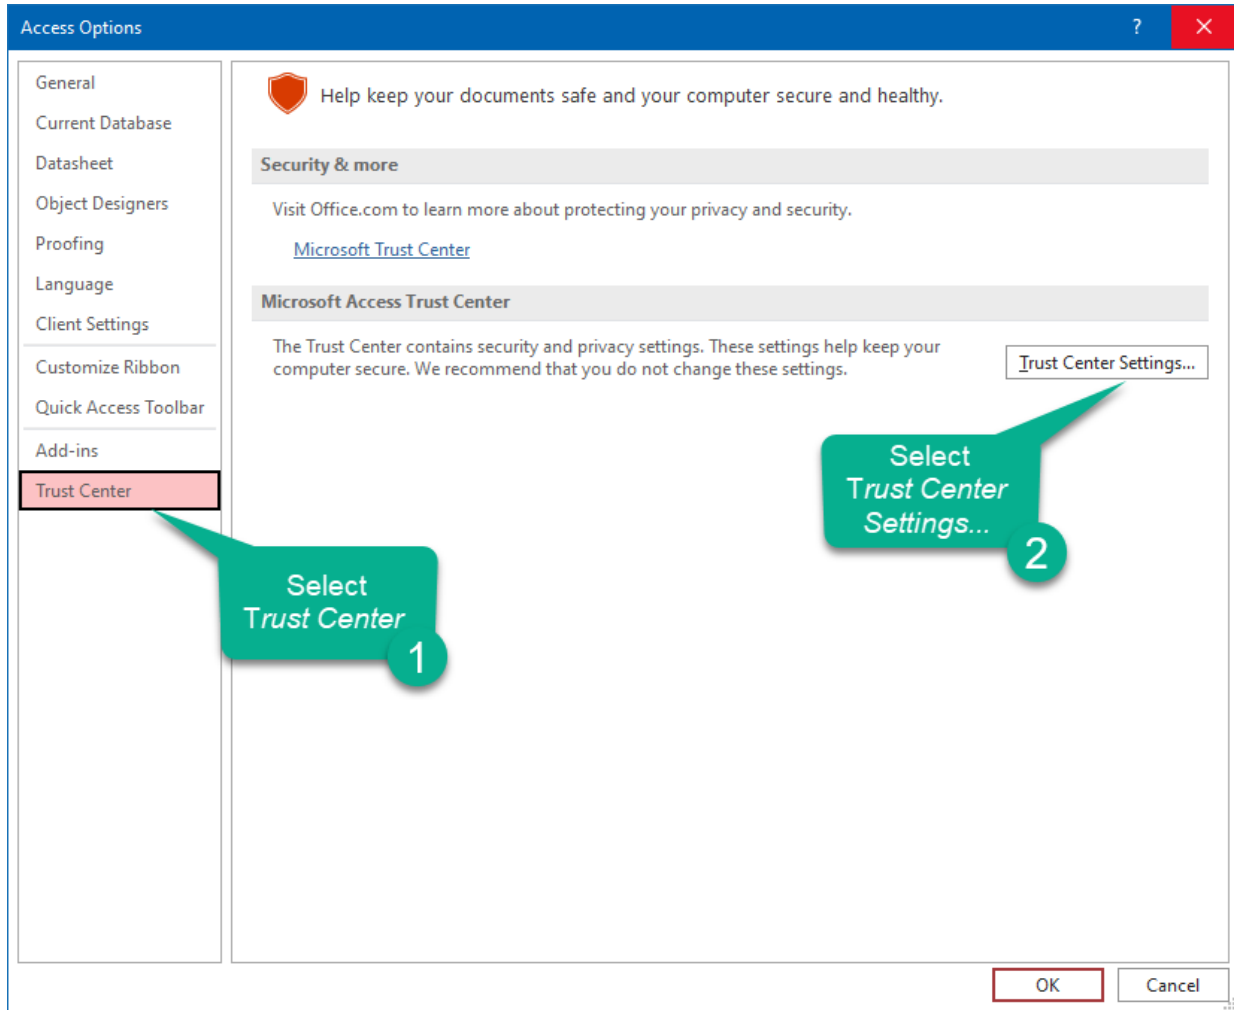

The best way to avoid the annoying Microsoft Access Security Notice is to create a trusted location for your database. Create a trusted location and never see this message again.

## Solution: Define a trusted location

- Open Microsoft access
- Click *File* from the menu
- Click *options* near the bottom of the page

Then follow the prompts in the images below:

- Trusted Publishers
- Trusted Locations
- Trusted Documents
- Trusted Add-in Catalogs
- Add-ins
- ActiveX Settings
- Macro Settings
- Message Bar
- Privacy Options
- Form-based Sign-in

### Trusted Locations

Warning: All these locations are treated as trusted sources for opening files. If you change or add a location, make sure that the new location is secure.

Path	Description	Date Modified
<b>User Locations</b>		
C:\...3		8/31/2020 7:02 PM
D:\		4/28/2016 8:51 PM
C:\		4/28/2016 8:51 PM
C:\...ic		
<b>Policy Locations</b>		

Path: C:\Users\S...ples\DB-Samples\  
 Description: Calendar D  
 Date Modified: 8/31/20...  
 Sub Folders: Allowed

Add new location...

The screenshot shows the 'Trust Center' window with the 'Trusted Locations' tab selected. A table lists existing trusted locations. A 'Microsoft Office Trust Center' dialog box is open, showing the 'Path' field with a callout '5' pointing to the 'Browse...' button and the text 'Click to find the desired folder'. Below the path field, the 'Subfolders of this location are also trusted' checkbox is checked, with a callout '6' pointing to it and the text 'Click'. The 'Date and Time Created' field is visible, with a callout '7' pointing to the 'OK' button and the text 'Click'. At the bottom of the dialog, the 'Allow Trusted Locations on my network' checkbox is checked, with a callout '8' pointing to it and the text 'Click'.

Path	Description	Date Modified
<b>User Locations</b>		
C:\...3\Downloads\DB-Samples\DB-Samples\	Calendar DB Local.accdb	8/31/2020 7:02 PM
D:\		4/28/2016 8:51 PM
C:\		4/28/2016 8:51 PM

Another method for advanced users is to create a registry entry.
